

Provation® iPro

#1 Anesthesia Information
Management System

Designed by practicing anesthesiologists, Provation® iPro is the world's first mobile, cloud-based Anesthesia Information Management System (AIMS). This intuitive software as a service (SaaS) platform integrates with MEDITECH Expanse to simplify workflows, enhance patient safety, and produce a more complete, compliant, legible electronic anesthesia record.

INTEROPERABLE

Integrate with the MEDITECH system you already use to create seamless clinical records & billing processes.

REPORTING & ANALYTICS

Gain clinical insights & business intelligence to improve operations.

MOBILE

Manage multiple cases simultaneously by documenting procedures on a tablet as you move in & out of the OR.

AUTOMATED BILLING

Save time & reduce error rates with built-in charge capture templates.

Users eliminate manual, redundant data entry and are able to refocus on patient care with features like:

- Anesthesia-specific perioperative workflows
- Automatic capture of vital signs in real time
- Procedure templates for routine documentation
- Compliancy safe guards with Microsoft Azure
- Device agnostic — access via browser or on a mobile tablet

With the full Provation iPro AIMS portfolio, your team can benefit from a wide assortment of helpful features, including Data & Analytics, Perfusion, OB Labor & Delivery, and Acute Pain modules.

Right-Sized Price for All Sites

- Affordable subscription
- No expensive servers to buy or maintain
- Minimal IT footprint and support needed
