Provation® iPro Cybersecurity

Unmatched Security Benefits for Your Peace of Mind

Provation iPro is designed with state-of-the-art security protocols and compliance measures, ensuring the safety and confidentiality of your data.

With multiple layers of protection and adherence to rigorous industry standards, Provation iPro leads the industry in safeguarding your data. Our platform not only meets but exceeds compliance requirements, giving you confidence that your sensitive information is always secure and accessible when needed.

With Provation iPro, you'll find:
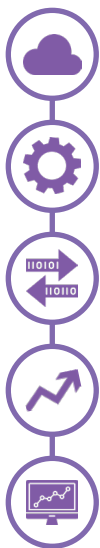

- Multiple protection layers of cloud security

- Reduced IT and security burden

- Continuous, real-time security updates

- Increased operational scalability with easy go-lives

- Maximized business continuity with no burden for backups

The future is moving toward electronic documentation, but hospitals and ASCs are still weary of lost or misplaced PHI data or a catastrophic data breach.

Provation iPro goes above and beyond mandatory practices like HIPAA by employing internal and external teams to manage data protection, receiving extensive security certifications (SOC2 Type 2 and ISO27001) and changing the way customers feel about hosting data.

Leave Paper in the Past with Provation iPro

Now, more than ever, is the time to choose a solution that puts your organization's and your patients' data protection first. Layers of controls and dedicated individuals are what sets Provation iPro apart.

WHO?

Provation iPro's Internal and External Defense Team

Rest assured with Provation iPro, knowing that a defense team is always by your side to keep your data safe and secure with:

- ✓ Monitoring by the Provation Cloud Team, who applies all server updates and responds to alerts
- ✓ Support 24/7/365 by the Provation Security Operations Center

HOW?

Provation iPro's Unrivaled Security Compliance and Features

Provation has developed multiple security layers to safeguard the transmission and storage of your protected data with:

- ✓ Multiple protection layers to safeguard the transmission and storage of your protected data
- ✓ TLS 1.2 encryption for data in flight and AES 256 encryption for data in rest
- ✓ CIA security framework to ensure confidentiality, integrity and availability of your data
- ✓ Enhanced security mitigating impact of malware and ransomware
- ✓ Weekly vulnerability scans and review
- ✓ Quarterly external penetration testing

WHAT?

Provation iPro's Goal to Protect Customers with Additional Controls

Operating under Microsoft Azure Cloud, Provation iPro maintains industry standard "uptime," so that our customers' data is monitored and protected. Azure georeplicates data in another part the country, so that data is never lost and is always available.

Certifications include:

AICPA Service Organization Control Reports — AICPA SOC 2 TYPE II — Formerly SAS 70 Reports
